Work logs [After Progress report2]

Date	Hours	Description of Work Done
19/03/2026	5	I implemented the follow/unfollow feature and got AI-generated stories showing up on the home page. Then I merged a (Aditi_0044) branch into main, handled the merge conflicts that came up, and fixed some broken API paths for the view book page that broke during the merge.
20/03/2026	4	Fixed leftover errors from the merge, updated some UI on the Dashboard and cleaned up routes. Squashed a bug with book deletion, then tracked down and fixed errors in the book editor and made some changes to the book controller. Added Followers/Following lists on the profile page so users can see who's following them. Finally, built out the AI Avatar feature where users can upload a photo and generate a stylized avatar from it.

21/03/2026	2	Continued working on AI-generated image avatar for story creation.
22/03/2026	1	Meeting with Aditi about the few more changes and share weekly progress
23/03/2026	1	Work on report#5.

Summary Description of work done during this reporting period:

I implemented the **follow/unfollow** feature and wired up AI-generated stories to display on the home page. Fixed a bunch of post-merge conflicts and broken API paths along the way.

Cleaned up some **Dashboard UI and routes**, fixed the **book delete bug**, and resolved a sneaky missing response line in the book controller that was causing the editor to hang silently.

Added **Followers/Following modals** on the profile page so you can click the counts and see the actual user list with avatars. Also built out the **AI Avatar feature**; upload your photo, pick a style, and it generates a stylized avatar you can turn into a story

Repo Check in of Implementation completed: The files and folders I have check in are as follows:

Branch: main

- **Implemented follow and unfollow structure in the project. Genereted story will display in the home page.**
- **Merge branch 'Aditi_0044' into main**
- **Merge pull request #18 from KhushiBhatt22/main**
- **Resolved error of apipaths for the view book page and some git conflicts.**
- **Resolved some error after merging**
- **Update some UI changes on the Dashboard page. Changed some routes.**
- **Resolved the error occuring while deleting a book.**
- **Resolved error in book editor page and applied some changes in the book controller.**
- **Added followers and following lists in the profile.**
- **Implemented the logic to generate ImageToImage avatar.**

AI Usage –

AI Tool Name	Version / Account Type	Specific Feature for which AI Tool was Used	Value Addition (What value did you add beyond the AI?)
Claude	Sonnet 4.6/Free	Fixing merge conflict in bookController.js	Identified the root cause was a silent timeout, tested the fix and verified the editor loaded correctly after
Claude	Sonnet 4.6/Free	Cleaning up socialController.js	Reviewed the two versions of getFeed and confirmed which one to keep based on project structure
Claude	Sonnet 4.6/Free	Building Followers/Following modal	Integrated follow/followers into existing profile layout, tested navigation to user profiles from the modal
Claude	Sonnet 4.6/Free	Implementing AI Avatar generation feature	Debugged Hugging Face model availability error
Claude	Sonnet 4.6/Free	fixing broken /dashboard routes across the app	Ran findstr searches to verify no remaining imports before deleting files Dashboard Page, DashboardLayout.
