

Project – Bookstagram

Progress Report-2

CSIS – 4495-002

Applied Research Project

Khushi Bhatt – 300394398

Work logs [After Midterm]

Date	Hours	Description of Work Done
22/02/2026	2	Completed and submitted the midterm progress report. Documented project status, summarized features implemented so far, and outlined upcoming milestones for the Bookstagram application.
23/02/2026	2	Conducted a team meeting to discuss post-midterm goals. Reviewed pending features including book recommendation logic, user profile page, and AI-generated book cover previews. Assigned tasks and set deadlines.
26/02/2026	2	Tested the current state of the Bookstagram application. Verified book search functionality, tested user login and registration

		flows, and identified two bugs related to image rendering on the feed page.
27/02/2026	2	Researched and experimented with Gemini AI's image generation API to generate stories. Explored prompt engineering techniques to produce relevant and styled cover art for book listings in the app.
1/02/2026	1	Worked on Progress Report 2. Documented work completed after the midterm, updated repo check-in details, and drafted the AI usage section with specific tools and their contributions to the project.
2/02/2026	1	Proofread and finalized Progress Report 2. Reviewed all sections for clarity, corrected grammar and formatting, verified accuracy of work log dates and hours, and prepared the document for submission.

Summary Description of work done during this reporting period:

During this reporting period, I focused on completing the midterm progress report and advancing the Bookstagram project. I held a team meeting to align on post-midterm goals and assign upcoming tasks. I conducted testing of core application features including user

login, registration, and the book feed and identified and logged bugs for resolution. Additionally, I explored Gemini AI's image generation API to implement AI-generated book cover thumbnails, experimenting with prompt engineering techniques suited to different book genres. The period concluded with drafting and proofreading Progress Report 2 to ensure accuracy and clarity before submission.

Repo Check in of Implementation completed: The files and folders I have check in are as follows:

Branch: main

- Add files via upload
- Formatting the file
- Revise README with project and team information
- Project description, features and Installation instructions

AI Usage –

AI Tool Name	Version / Account Type	Specific Feature for which AI Tool was Used	Value Addition (What value did you add beyond the AI?)
Chatgpt (OpenAI)	GPT 4, Free version	Research on image generation technique	Manually evaluated and filtered AI-generated suggestions, selecting only techniques suitable for the Bookstagram use case. Integrated the chosen image generation approach into

			the app architecture and wrote custom prompt templates tailored to book genres.
Claude AI	Free version	Code explanation and debugging assistance; report writing and documentation drafting	Critically reviewed all AI-suggested code before using it. Understood each snippet, modified it to match the project's structure, and personally wrote the final implementation. Used Claude only as a starting reference, not a copy-paste source.
Grammarly	Free version	Grammar and spelling correction; tone and clarity suggestions for report writing	All report content was originally written by me. Grammarly was used only as a proofreading tool to catch typos and improve sentence flow. Final phrasing and all technical details were

			independently composed.
