Progress Report-4

CSIS – 4495-002

Applied Research Project

Aditi, Aditi– 300396361

Work logs [After Progress report3]

Date	Hours	Description of work Done
10/3/2026	3 hr	Created pull request from main to Aditi branch (10 min). Brainstormed new dashboard to display books by followed users (20 min). Made wireframe for frontend pages and planned 8-step implementation: Step 1 – NewDashboardLayout.jsx (sidebar + topbar shell), Step 2 – NewDashboardPage.jsx (home feed), Step 3 – ExplorePage.jsx (all books grid), Step 4 – ThreadsPage.jsx (threads feed), Step 5 – MessagesPage.jsx (chat UI), Step 6 – SettingsPage.jsx (settings), Step 7 – Update App.jsx (swap routes), Step 8 – Update ProfilePage.jsx (add books + create button) (15 min). Worked on DashboardLayout page with AI assistance (50 min). Worked on DashboardPage with AI assistance (50 min). Updated routes in App.jsx (15 min).
11/3/2026	1 hr 30 min	Meeting with Khushi about profile page (40 min) and fixed some errors in dashboard page (50 mint)
13/3/2026	4 hr 20 min	Worked on Explore page layout and design (55 min). Worked on Thread page (1hr). Made changes to Explore page (20 min). Built Message page UI — not yet working (1hr 10 min). Worked on Settings page, added full UI (1 hr 45 min). Added only UI today across all new pages.
14/3/2026	1 hr	Meeting with Khushi to review yesterday work (1 hr).
15/3/2026	3 hr 50 min	Worked on Settings – Edit Profile page: changed URL for photo upload, updated some backend files, connected backend to frontend, added bio field in user.js, updated authController (1 hr 15 min). Implemented Change Password in Settings: added

		function in authController, updated authRoute, updated apipaths (50 min). Updated Settings.jsx again for password and bio functionality (40 min). Tested change password functionality – working correctly (15 min). Solved error with photo upload feature (45 min).
16/3/2026	1 hr 30 min	Worked on Progress Report 4 — gathered all work logs, noted down commits, and started drafting the report (1:30 hr).
16/3/2026	10 min	Update report on Github

Summary Description of work done during this reporting period:

During this period, I focused on designing and building the new dashboard layout and key frontend pages for the Bookstagram application. I started by creating a pull request, brainstorming the new dashboard structure, and making a wireframe outlining an 8-step implementation plan covering NewDashboardLayout, NewDashboardPage, ExplorePage, ThreadsPage, MessagesPage, SettingsPage, along with updates to App.jsx and ProfilePage.jsx. I implemented DashboardLayout and DashboardPage with AI assistance and updated routes in App.jsx accordingly. Following a meeting with Khushi to align on the profile page, I built the full UI for Explore, Thread, Messages, and Settings pages on March 13th. In the later part of the reporting period, I worked on connecting the Settings – Edit Profile feature to the backend, adding photo upload support, adding a bio field to user.js, updating authController and authRoutes, and implementing the Change Password feature end-to-end. All changes were tested and confirmed to be working correctly.

Repo Check in of Implementation completed: The files and folders I have check in are as follows:

Branch: Aditi0044

- *Create pull request from main to Aditi branch*
- *Add NewDashboardLayout.jsx (sidebar + topbar shell)*
- *Add NewDashboardPage.jsx (home feed)*
- *Add ExplorePage.jsx (all books grid)*

- *Add ThreadsPage.jsx (threads feed)*
 - *Add MessagesPage.jsx (chat UI)*
 - *Add SettingsPage.jsx (settings)*
 - *Update App.jsx with new routes*
 - *Update ProfilePage.jsx (add books + create button)*
 - *Changes to Explore page UI*
 - *Work on Thread page*
 - *Work on Messages page UI*
 - *Work on Settings page full UI*
 - *Update Settings – Edit Profile: photo upload URL*
 - *Update backend files for photo upload*
 - *Add bio field in user.js*
 - *Update authController for bio and photo*
 - *Add change password function in authController*
 - *Update authRoute for change password*
 - *Update apiPaths for change password*
 - *Update Settings.jsx for password and bio functionality*
 - *Solve photo upload error*
-

AI Usage:

AI Tool Name	Version / Account Type	Specific Feature for which AI Tool was Used	Value Addition (What value did you add beyond the AI?)
ChatGPT (OpenAI)	GPT-4o, Free version	Designing new Dashboard layout with sidebar navigation — Home feed, Explore, Threads, Messages, Settings pages	Reviewed the generated layout structure, matched colors to existing brand theme (#d946ef, #fb923c), integrated with existing AuthContext and axiosInstance, tested routing and fixed active nav state manually.
ChatGPT (OpenAI)	GPT-4o, Free version	Building DashboardPage.jsx – home feed layout and UI design	Evaluated the AI-generated layout, modified the component hierarchy to match project conventions, verified data flow from backend, and manually tested the feed display.
ChatGPT (OpenAI)	GPT-4o, Free version	Implementing profile photo upload feature — backend	Identified missing avatarPath variable bug in generated controller, fixed

		uploadProfilePhoto controller, authRoutes multer setup, and frontend Settings page camera upload button	/backend/uploads/ path to match existing server.js static file configuration, tested upload end to end.
ChatGPT (OpenAI)	GPT-4o, Free version	Debugging photo upload error in Settings – Edit Profile	Analyzed the error independently by reviewing backend route and middleware, identified the root cause, applied the fix, and verified the photo upload worked correctly end-to-end. (but the issue is still under investigation and not yet resolved.)
ChatGPT (OpenAI)	Free version	Fixing bio field not showing on ProfilePage — updating socialController .select() query and authController getProfile response	Traced the bug across three files independently, verified which API response was missing the field, applied targeted fixes without rewriting working code
