Work logs [After Progress report2]

Date	Hours	Description of Work Done
4/3/2026	3	Add route for export pdf and add middleware for uploading. Learn the setting of export Controller, import library for markdown parser, defining all the styling rules for word doc
5/3/2026	2.15	Completed the logic of download books as pdf and document. Solved some error of missing markdown, heading.
6/3/2026	2	Added stories path, updated DashboardPage and Dashboard Layout with horizontally scrollable stories with gradient rings, story viewer modal, centered the logo. Solved error of loding the story model.
7/3/2026	1.30	Meeting with Aditi about project features, Resolved export PDF/DOC issue by fixing route paths and correcting the exportController import that

		caused 404 and module not found errors
9/3/2026	1	Proofread and finalized Progress Report 3.

Summary Description of work done during this reporting period:

During this period, I focused on finishing the exporting books features, where user can download books as pdf and word documents. Following the completion of that feature, I put my focus on generating a story frontend for a user and resolving some error on exporting books and loading the Dashboard page with new story feature implementation.

Repo Check in of Implementation completed: The files and folders I have check in are as follows:

Branch: main

- *Merge pull request #7 from KhushiBhatt22/Aditi_0044*
- *Add route for export pdf and add middleware for uploading.*
- *Delete Implementation/backend/.env*
- *Learn the setting of export Controller, import library for markdown parser, defining all the styling rules for word doc*
- *Merge branch 'main'*
of https://github.com/KhushiBhatt22/W26_4495_S2_KhushiB
- *Modified exportController file by Implementing a feature to export book (.docx) format, converting markdown chapters into styled word content with headings, lists and a cover/title page*
- *Merge branch 'main'*
of https://github.com/KhushiBhatt22/W26_4495_S2_KhushiB
- *Added stories path, updated DashboardPage and Dashboard Layout with horizontally scrollable stories with gradient rings, story viewer modal, centered the logo.*
- *Resolved export PDF/DOC issue by fixing route paths and correcting the exportController import that caused 404 and module not found errors.*
- *Added Empty .env file*

AI Usage –

AI Tool Name	Version / Account Type	Specific Feature for which AI Tool was Used	Value Addition (What value did you add beyond the AI?)
Chatgpt (OpenAI)	GPT 5.3, Free version	Integrating story feature like instagram	Researched on how the new story feature is implemented, got some references from the google, and implemented the frontend structure which align with the file structure.
Claude AI	Free version	Debugging Export API returning 404 error	Analyzed server logs, checked route configuration, fixed incorrect module imports, and updated the backend structure so the export endpoint worked correctly.
Chatgpt (OpenAI)	GPT 5.3, Free version	Converting Markdown content into DOCX format	Implemented the markdown parsing logic, structured paragraphs and lists correctly for DOCX output, and integrated the feature into the backend export functionality.
Chatgpt (OpenAI)	GPT 5.3, Free version	Git branch management and merging updates from main branch	Executed Git commands to pull updates from the main branch into the feature branch and resolved merge conflicts
